

2012 INTERNATIONAL WORKSHOP ON ENVIRONMENT AND ALTERNATIVE ENERGY

“Enabling Sustainable Space Exploration”

Greenbelt, Maryland – December 4 – 7, 2012

Student Invitation for Presentations

Graduate and Undergraduate Students are Encouraged to Participate
Being held at NASA's Goddard Space Flight Center

The National Aeronautics and Space Administration (NASA), and European partners, intend to raise awareness with students for the latest technologies, especially towards environmental and alternative energy strategies.

The workshop will provide opportunities for students to meet and work with students from universities and industries around the globe on projects related to:

- Potential Principles for Greening Space Systems
- Use of Life Cycle Assessments (LCA) in Aerospace Applications
- Environmentally-Driven Changes to Aerospace Materials and Processes
- Quantification of Green Roofs' Contributions to Building and Community Performance
- Facility Energy Supply Solutions for Critical Applications including Energy Security

Workshop Registration

Although there is no cost to attend the workshop, registration is required.

For student session details visit: <http://teerm.nasa.gov/workshop.htm> and click on the student session link on the left.

Please submit your abstract to Michelle Lamb at lamb@itb-inc.com
