Jill,

I have alerted the lab in Miami, and other people involved in download, processing and delivery of the on-board 16mm films -- that we can expect to expedite the process. I believe everybody is prepared to do so.

Subject: STS-107 ET Camera Destow

I have requested runway removal of the ET cameras.

Before we start to make arrangements for getting the ET TPS camera back to JSC, we are going to wait a few days and see when landing is going to occur. Rumors are that we may stay a few days longer (which actually makes things better for getting the camera back to JSC!!). I will convey our plans to all as they develop. And I'll be seeking Bob's persuasive management assistance if needed!!!

As for Robbie, you can plan accordingly to get the 16mm film on the day of landing.

I'll be in touch.
